SAFE GUN HANDLING

You should be fully familiar with the proper and safe handling of your gun. The basic principles of gun safety require you to always apply the following rules when handling the firearm.

Always treat a gun as if it was loaded.
Always put the safety of a gun to safe when loading it so that there can be no unintentional discharge.
Keep your finger away from the trigger. It should be straight and should rest on the trigger guard.
Only use the kind of projectiles suitable for your gun.
Always keep the muzzle pointed in a safe direction.
This gun may only be discharged in your own house, on authorized shooting ranges and inside enclosed private property. It is to be made sure that no projectile can leave the enclosed property.
Keep the danger area of the projectile in mind.
Never transport a loaded gun. Only load your gun when you intend to fire it.
Never aim your airgun at persons or animals. Avoid ricochets. Never fire at smooth, hard surfaces or water.
Always make sure that the gun is not loaded when you transport it or take it from another person. Make sure that you always have full control over the muzzle of your gun, even if you stumble or fall down.
Safety shooting glasses should always be worn when firing the gun.
Always store your gun in a safe place and in unloaded condition. Unauthorized persons (persons not familiar with the use of guns, children) must not have access to it. Ammunition is to be kept in a separate place.
This gun and its instruction manual may only be passed on to persons
- who are fully familiar with its use and
- who have reached the legally stipulated minimum age in the respective country.
Modifications or repairs of guns are only to be effected by authorized agencies or by a skilled gunsmith.
Never leave a loaded gun unattended.
Only unloaded guns are to be handed over to another person.

REPAIR
A gun that does not work properly is dangerous. Do not attempt to repair this pistol if it needs service. Incorrect assembly could lead to dangerous malfunctions.
Caution: Repairs should only be completed by Umarex authorized centres.

Note on batteries: Batteries must not be exposed to excessive sources of heat such as sunshine, fire or similar. Only rechargeable batteries may be charged. It is unlawful to dispose of used batteries along with common household waste. You are obligated to dispose of old batteries (free of charge) at a public collection point, a business which will accept their return or at a technical customer service location. Used primary and secondary (rechargeable) batteries contain high percentages of reusable substances, so-called recoverable resources. By ensuring their recovery through appropriate recycling processes instead of combining them with common waste materials, you make a contribution in preserving important resources and protecting the environment from harmful heavy metal substances. Batteries containing pollutants are marked with the symbol of a crossed-out garbage can and a chemical symbol (Cd, Hg or Pb) which is essential for classification of the polluting heavy metal. Please contact your local authorities for information about disposal facilities.
For lithium-based primary and secondary batteries: Only dispose of completely discharged batteries. If a battery is not completely discharged, precautions must be taken to prevent short circuiting its terminals, e.g. isolation of the terminals.
**SAFETY**

**CAUTION**
- Only handle your gun in its safe condition.
- Always make sure that the muzzle points in a safe direction.

CAUTION

When batteries are almost empty they can cause gearbox malfunctions that require repair. Batteries should never be overdischarged. This can damage the cell. Prolonged overcharging causes permanent damage to batteries. The battery should always be drained before charging.

There is no warranty for batteries, because they are wear parts. Use only those batteries of 9.6 V (Crane Stock e.g. Article-No.: 2.6001) / 8.4 V (PEQ 15 e.g. Article-No.: 2.6002). Please note that flat batteries must not be put in the household waste. Dispose of them properly, hand them in at your local shop for disposal or take them to a used battery collection location.
