**Stock Assembly**

1. The package includes main body, a stock and a screw.
2. Push the button to release the hinge.
3. Use the allen wrench (included in box) to tighten the screw.
4. Make sure the stock is stable.

**Adjust Folding Stock**

5. Push the button to adjust the buttstock pad vertically.
6. Press the button to adjust the buttstock pad horizontally.
7. Pull the monopod and fold it downwards.
8. Press the monopod upwards to lock it in place.
9. Adjust the height of the monopod by rotating the handle.

**Adjust Grip**

1. Release the screw inside the grip.
2. Adjust the grip horizontally.

3. Push the stock upward to unfold.
4. Push the button to close the stock in place.
5. Release the screw to adjust the cheek piece.
6. The cheek piece can be adjusted vertically.
**Safety**

1. Safety position.
2. Off safe position.

**BBs Load**

1. Push the magazine release button and pull out the magazine.
2. Load 6mm BBs into the magazine.
3. Insert the magazine until a click is heard.

**Firing**

1. Move the cocking handle upward.
2. Pull back the cocking handle.

3. Push the cocking handle forward.
4. Move the cocking handle downward to close the bolt.

By applying a back-spin to the BBs when firing, the trajectory of BBs can be altered in order to obtain better flight and precision of the BBs referred to as the Hop-up system. There are two types of Hop-up systems; the fixed and the adjustable. The adjustable Hop-up system allows for fine-tuning and trajectory of the BBs.

**Hop-up Adjustment**

By applying a back-spin to the BBs when firing, the trajectory of BBs can be altered in order to obtain better flight and precision of the BBs referred to as the Hop-up system. There are two types of Hop-up systems; the fixed and the adjustable. The adjustable Hop-up system allows for fine-tuning and trajectory of the BBs.

- Gradually rotate the Allen wrench (included in box) forward and fire a round or two to see the effect.

**CAUTION**

- The Hop-up function can be unstable the first 200-300 rounds after applying oil. Oil should be applied for ca. every 10,000 rds. fired.
- Turning the Hop-up dial excessively can cause the BBs to clog the Airsoft gun and damage the piston and gears. Reset the adjustment dial to normal and readjust the Hop-up.
